

Dear Geneva Forum Plenary Sesssion Speakers,

First of all we would like to take this opportunity to thank you for your participation in the Geneva Forum: Towards Global Access to Health. Your participation as a speaker in the plenary sessions was vital to the success of the forum and we are grateful for the time and effort you put into your session(s).

As we are all concerned with 'access', it is our wish to render the forum as accessible as possible to those that were unable to attend, especially those in developing countries. It is with respect to this issue that we would like to briefly inform you of one potential initiative we would like to undertake via the RAFT (<http://raft.hcuge.ch/>).

The RAFT network, focussing on tele-learning and tele-medicine, is geared towards creating a South-South network of university hospitals, regional hospitals, and rural health centres in francophone Africa. We would like to place an audio recorded version of your presentation with a simultaneous pdf version of your powerpoint presentation, on the website of the RAFT. To be more specific: we will NOT place a powerpoint version of your presentation on the web, but rather a pdf version as you presented it along with your voice as you presented it. In other words, the powerpoint document will not be downloadable as such, only available for lecture only. As the RAFT network is for French-speaking countries, the French translation will be used rather than the English. However, if you agree, we hope to have a budget earmarked to do the same in English on the website of the Forum. For these two possibilities, we would like to ask your permission.

Should you agree please inform us immediately by email. We also must request, for administrative reasons, that you print out this email and sign for agreement, sending us one original by regular mail.

Yours sincerely,

Dr Slim Slama  
Coordinator of the programme of the Geneva Forum

Please check one or both :

- Yes, I agree to have the French version of my presentation on the RAFT network website.  
 Yes, I agree to have the English version of my presentation of the Geneva Forum website.
