Cheik Modibo Diarra's dream....

The Millenium Development Goals (MDGs) 2015

- The most widely ratified set of development goals ever signed
- Reduce under-five child deaths by two-thirds from a baseline in 1990
- Reduce maternal mortality by three-quarters in the same period

To achieve the Millennium Development Goals

- Primary care is the strategic frontline, but...in most countries
- Update training for primary care professionals is missing
- Local teaching resources are not available (migration of qualified professionals)

HOPES

Health Operational program through
Education and Surveillance network

Since 2005

- In Burkina faso and Mali

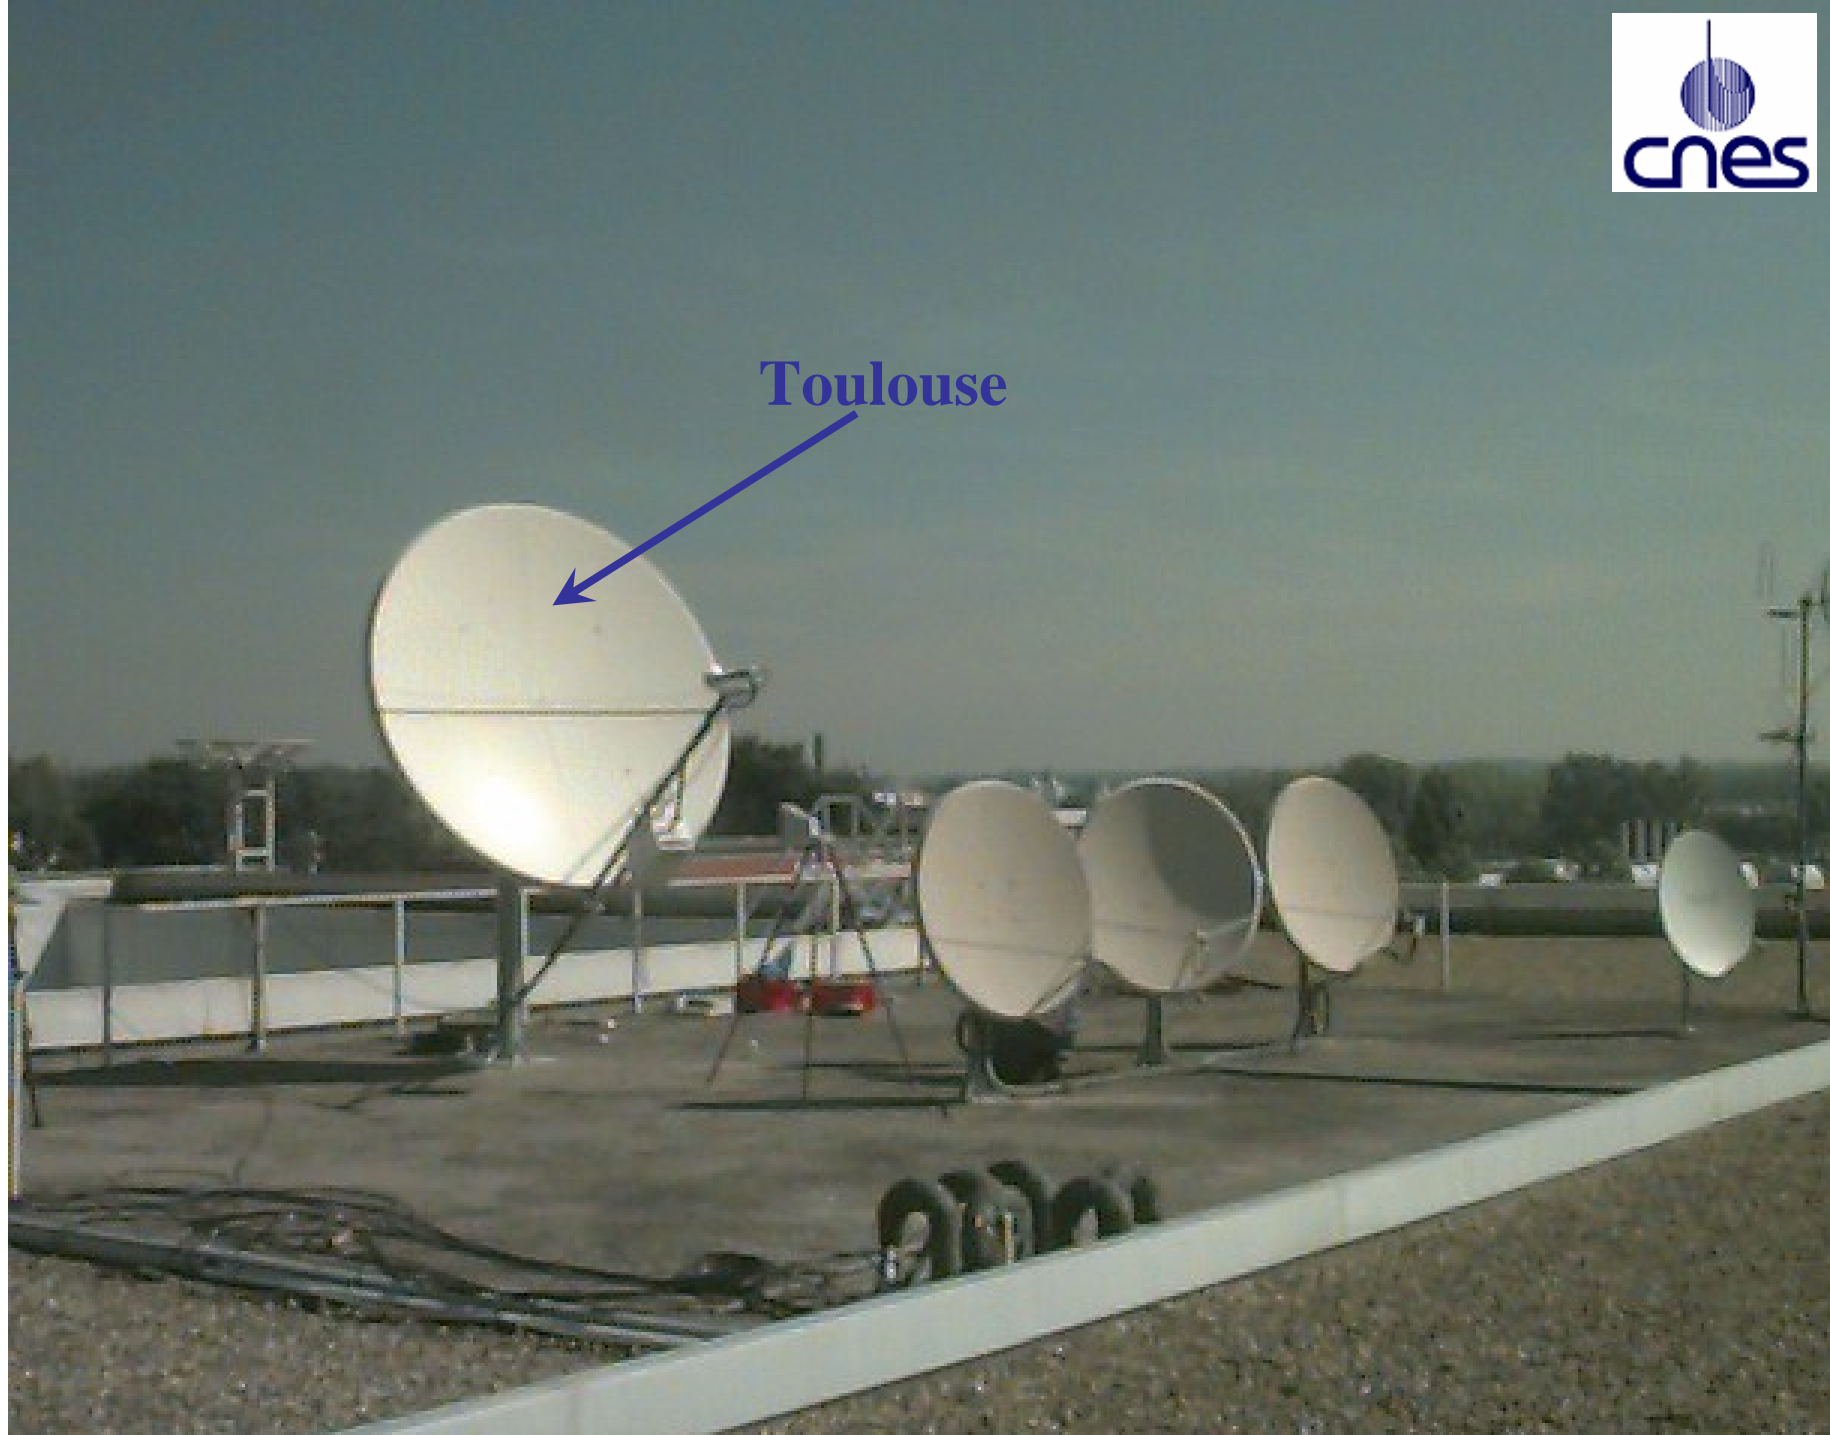

HÔPITAL

Toulouse

What is specific

- Agreement with african universities
- Training on healthcare & how to use computers
- In addition to local teaching, Direct interactive course, offline access to recorded courses on local server or DVD
- UNFM network of qualified primary care professionals
- Access to information is free of charge
- Registration fees for examination

What is specific

- Focus on child and maternal health
- Focus on dissemination of knowledge and not on technology, (ex : collaboration with RAFT)
- Concern on sustainability : public-private partnerships (shared classroom with enterprises)

Perspectives

- In Mali and Burkina, extend the system to the regions; develop new local partnerships
- Extend the system in the capitals of new countries
